### DETAILED ACTION

1. In view of the amendment of July 28, 2006, previous 103(a) rejection on claim 1 over Sugano et al WO'079 in view of Takanezawa et al (JP'185) or Uruno et al (JP'021) and previous 103(a) rejection on claim 1 over Akiyama et al'368 are hereby withdrawn.
2. In view of the Terminal Disclaimer, previous double patenting rejection on claim 1 over U.S. Pat. No.'300 is hereby withdrawn.
3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, applicant recites (as preamble) "[a] positive-type photosensitive composition for photogravure printing". That is, the preamble of the claim is drawn to a composition (a product). Then, at the end of the claim, applicant recites that the composition is coated on a photogravure plated roll. That is, at the end of the claim, applicant is claiming a photogravure printing plate precursor (an article), which comprises (i) a photogravure plated roll (a support) and (ii) the present composition that is coated onto the photogravure plate roll. Thus, the scope of present claim 1 is indefinite. For the purpose of examining the claim on the merit, the Examiner interpreted claim 1 as claiming a photogravure printing plate precursor. The Examiner would like to suggest applicant to rewrite claim 1 so that it is clear that he/she is claiming a photogravure printing plate precursor (which comprises a photogravure plated roll (a support) and the present composition that is coated onto the photogravure plate roll).

***Allowable Subject Matter***

6. Claim 2 is allowed. None of the previously cited prior arts teaches or suggests present method of making a photogravure plate as claimed in present claim 2.
